Summary

Software Engineer with exceptional skills in Python, Web development and many other technologies.

I can code your imagination in Virtual reality.

Experience

Python developer (Singapore)

Scantist - Sep 2022 - Present (7 month+)

- Part of the Backend development team and leading a team of 2 developers to make an improved version of the current product to make it an industry level product. Revamping the code base using PEP8 and SOLID principles.
- Creating new Data Pipelines to reduce the API response time and make it more scalable. Creating new REST APIs.
- We are using SQL and NOSQL databases like PostgreSQL, for cloud AWS and GCP, CI/CD pipelines, Docker for containerization, GIT for version control, using React.js in Frontend and Kubernetes on devops side. We work in an Agile environment.
- Using Redis-celery for the server side cache and use of Async APIs to increase the user experience and reduce the response time.
- Dividing the single Django project into multiple Apps to reduce load of the current application and introducing microservices architecture. Also writing Test cases using the Django library and using tools like postman, visual studios for debugging and troubleshooting.

Software Engineer (Remote)

Netguru -(Contract)- Nov 2020 - Aug 2022(1 year 8 months)

Worked on multiple web applications mainly using Django and Flask. moving application from monolith to microservices architecture. training client side of developers, Developed and managed API. using python as the primary language, Mainly used AWS, docker, git, GCP, redis-celery for python frameworks. **worked under B2B contract**

Software Developer (India)

Amdocs -(Contract) - Sep 2019 - Nov 2020 (1 year 3 months)

- Developed a Django-REST based Web-application for the global People-analytics team, used the MongoDB for the database management, designed the frontend using React, Bootstrap. Deployed it on AWS. Currently used by 13000 employees on a daily basis.
- Developed a Flask based application to automate the process of getting the details of suitable candidates for specified roles from LinkedIn. I used selenium, python, and Sqlite to make the project. Using this application organization saved \$50,000/year and reduced human effort by 3 hours per day.
- Implemented a Django based web application to showcase AI-generated personalized learning for each employee, created a dashboard to keep track of the progress, set goals etc., using python, react to make this project, it is currently used by 17000 Indian employees. Deployed on AWS.

Education

Vellore Institute of Technology

Bachelor of Technology, Computer Science

2015 - 2019

Skills

Python • Django • Flask • SQL • NO SQL • Docker • AWS • Git • Postgres • Redis • Celery • CI/CD • REST API • JavaScript • Postman • CSS • React.js
